Dear Ms. Smith:

Staff members of the Water Resources Division of the Geological Survey of Alabama have reviewed the Revised Sampling and Analysis Plan for the Remedial Investigation (RI)/Feasibility Study (FS) for the Olin Chemical McIntosh Plant Site, McIntosh, Alabama.

The Plan provides an adequate scope of work to evaluate the extent of sediment contamination at the McIntosh plant site. Sampling methods described in the Plan appear to be applicable to this type of investigation.

If we can provide additional assistance, please contact us.

Sincerely,

*Ernest A. Mancini*

Ernest A. Mancini  
State Geologist
